

Odessa State Environmental University, Ukraine

PhD student profile

Anna Iliina is currently studying a PhD program at Odessa State Environmental University, Ukraine.

Her research interests are modelling of influence of agrometeorological conditions photosynthetic productivity of agricultural plants in the conditions of climate change for the territory in the Steppe zone of Ukraine.

She studied courses developed under the framework of the Erasmus+ project “Integrated Doctoral Program for Environmental Policy, Management and Technology – INTENSE” in 2018-2019.

Academic interest:

- The Influence of Climate Change on the Humidification Regime of the Steppe Zone of Ukraine
- Features of the Temperature Regime Effect on the Duration of the Crops Vegetation Period in Southern Ukraine

PhD topic:

Modelling of the Process of Formation of Oat Crops in the Steppe Zone of Ukraine in the Conditions of Climate Change

PhD supervisors:

Anatolii Polovyi, д.геогр.н. проф. DSc (Geography),
Professor, Head of the Department of Agricultural
Meteorology and Agroecology, Odessa State Environmental
University
