

A review by an EU INTENSE partner

Course: Indoor air pollution control

Credits	3 ECTS (optional course)
Level	PhD students
Host institution	Hanoi University of Science and Technology, School of Environmental Science and Technology

Assessment criteria	Answer			Comments
	Yes	No	Need to be modified	
The course has appropriate place in curricula (year and semester of study)	Y			The positioning of this course in Curricula is appropriate.
Contents is relevant to the PhD program requirements	Y			
The course contents is well developed and allows to achieve learning outcomes and skills	Y			
Aim and objectivers are well formulated	Y			
Distribution of workload is well balanced	Y			No more suggestions. Everything is deemed correct.
Grading system is well developed and distribution of scores is well balanced	Y			Perhaps seminars can be devoted to igniting discussions or debates surrounding practical and tangible issues surrounding the topic in real-world situations.
Teaching methods are relevant	Y			
Literature is relevant	Y			
The course can be proposed to PhD students on other specialties and research areas	Y			

Overall assessment and comments:

This is a well designed course. The course workload, seminars and assignments cover most topics required for a broad understanding and improvement of knowledge for all participants. At the same time, it also provides students with appropriate opportunities to actively participate in discussions. The number of teaching sessions, practical activities, and self-learning units correspond with the teaching goals and contents. Also, In general, tests are suitable and appropriate to support transferable skills in this course.
