

A review by an EU INTENSE partner

Course: Environmental science

Credits	6 ECTS (optional course)
Level	MSc and PhD course
Host institution	National University of Mongolia, School of Engineering and Applied Sciences

Assessment criteria	Answer			Comments
	Yes	No	Need to be modified	
The course has appropriate place in curricula (year and semester of study)			+	Have no information where it is placed in curricula
Contents is relevant to the PhD program requirements	+			
The course contents is well developed and allows to achieve learning outcomes and skills			+	Applicable learning skills section should be rephrased and more thought through.
Aim and objectivers are well formulated	+			
Distribution of workload is well balanced			+	In course schedule it brought out that only lectures will happen during this course, as in grading section there is brought out that seminars, group assignments and individual work are also part of this course. Therefore it is confusing, what

				is actually part of this course.
Grading system is well developed and distribution of scores is well balanced			+	Same comment as above.
Teaching methods are relevant			+	If the course contains lectures + seminars, individual work etc., they are relevant.
Literature is relevant		+		List of relevant compulsory or recommended literature should be much longer
The course can be proposed to PhD students on other specialties and research areas	+			

Overall assessment and comments:

This course has definitely important part in shaping students views on environmental related issues. Therefore the description of this course should have more relevant content. It would be helpful to add table `course workload` so it would be clear, which activities will happen during this course (lecture, seminar, individual work etc.), what are learning outcomes, how are they related to assessment and what are the workloads.
