Course: Urban water management - The city blueprint approach

Credits	6 ECTS (optional course)
Level	MSc and PhD course
Host institution	National University of Mongolia, School of Engineering and Applied Sciences

Assessment criteria	Answer			Comments
	Yes	No	Need to be modified	
The course has appropriate place in curricula (year and semester of study)			+	Have no information where it is placed in curricula
Contents is relevant to the PhD program requirements	+			
The course contents is well developed and allows to achieve learning outcomes and skills	+			
Aim and objectivers are well formulated	+			
Distribution of workload is well balanced	+			There is a discrepancy among the top table (6 ECTS) and the description below (3 ECTS)
Grading system is well developed and distribution of scores is well balanced	+			
Teaching methods are relevant	+			
Literature is relevant	+			
The course can be proposed to PhD students on other specialties and research areas	+			

Overall assessment and comments:

Good design of a course, very helpful for understanding urban water management related issues both for MSc and PhD students. Course is set up using wide range of teaching methods allowing students to acquire different learning skills through active learning methods. Course topics are logically ordered and compulsory and recommended literature seems sufficient.
