

A review by an EU INTENSE partner

Course: PLANT BIOCHEMISTRY

Credits	2 ECTS (optional course)
Level	MSc and PhD courses
Host institution	Khovd State University of Mongolia

Assessment criteria	Answer			Comments
	Yes	No	Need to be modified	
The course has appropriate place in curricula (year and semester of study)	X			
Contents is relevant to the PhD program requirements	X			
The course contents is well developed and allows to achieve learning outcomes and skills	X			
Aim and objectivers are well formulated	X			
Distribution of workload is well balanced	X			
Grading system is well developed and distribution of scores is well balanced	X			
Teaching methods are relevant	X			
Literature is relevant	X			More recent literature could be included for demonstrating current applications of concepts
The course can be proposed to PhD students on other specialties and research areas			X	The course is focused on students with specific knowledge background, especially chemistry. For other specialties, the course should be modified to include

				chemistry basics.
--	--	--	--	----------------------

Overall assessment and comments:

The course has an appropriate design for achieving its aims and objectives. It includes different strategies for involvement of students, promoting presentation of background knowledge, data analysis, individual and group exercises, field work, seminar presentation and report writing. Moreover, some activities are designed for the application of theoretical concepts and techniques in situations relevant for environmental scientists and chemists. However, previous background on plant biology or physiology could be included as required courses, and modifications should be performed if it is intended to include students from other specialities. Also, basic literature is relevant, but more recent examples should be included for demonstrating current applications of this topic.
