

## A review by an EU INTENSE partner

### Course: Water Erosion of Soils

Credits	3 ECTS, 30 hours per credit
Level	PhD
Host institution	Odessa State Environmental University

Assessment criteria	Answer			Comments
	Yes	No	Need to be modified	
The course has appropriate place in curricula (year and semester of study)	X			
Contents is relevant to the PhD program requirements	X			
The course contents is well developed and allows to achieve learning outcomes and skills	X			
Aim and objectivers are well formulated	X			
Distribution of workload is well balanced	X			Despite larger workload, proposed activities are able to promote active independent learning
Grading system is well developed and distribution of scores is well balanced			X	Score for assignment #1 is too low compared to the others. Consider increasing it.
Teaching methods are relevant	X			It is clearly explained how the content is related to each one of the assignments
Literature is relevant	X			
The course can be proposed to PhD students on other specialties and research areas	X			Consider include additional applications

				than agricultural environments could be beneficial
--	--	--	--	--

**Overall assessment and comments:**

The course has an appropriate design for achieving its objective to make the students acquainted with the diverse concepts on soil erosion and being able to apply analytical and management methods for measuring the environmental status and forecasting of its influence on the development of erosion processes. Teaching methods are adequate; it focuses on group assignments but also includes lectures, presentations, and seminars. General learning outcomes are well described and aligned to course objectives and contents.
